

EC331 Thesis Coversheet

CANDIDATE NUMBER:	45405	WORD COUNT:	9288
Submission instructions 1. You must complete ALL sections of this coversheet. 2. Please upload your file, with the coversheet, as ONE individual PDF file within the dedicated Moodle portal. Please retain a copy of your submission. 3. You must ensure you submit your file, with the completed coversheet, before the deadline. Submission after the deadline will result in the application of late penalties as per School guidance here. 4. It is your responsibility to make sure that all relevant pages have been scanned and attached to your submission and that the submission went through the portal.			
Fit to sit /submit By submitting this assessment, you declare yourself fit enough to do so. "Fit" in this instance is not only physical or mental health, but also other factors that may affect your academic performance. If you are not fit to sit then please follow the School extension or deferral processes.			
Extensions and Deferral If you are impacted by exceptional circumstances proximate to the assessment deadline and wish to request an extension, please follow the School extension processes here. If your exceptional circumstances are such that a short extension is insufficient, then you are advised to follow the School deferral process here.			
Academic Integrity The work you submit should be <u>entirely your own</u>. You <u>must also not assist others in their work</u>. It is also important that you cite and reference work correctly to avoid plagiarism. You can find advice on citing and referencing here. Note that your work will be submitted through Turnitin as part of the submission process. By submitting you confirm that you understand School regulations on assessment offences, which can be found here and here. Academic misconduct cases will be pursued in full.			
AI Tools There is full authorised use of AI tools, such as ChatGPT, on this assessment. <u>Full authorised use:</u> The use of Generative AI is permitted on this assessment. In all submissions in which you use Generative AI, you must cite its usage. Failing to cite the use of Generative AI is a form of academic misconduct.			
Department of Economics Honour Code The Department of Economics is committed to the highest standards of academic integrity in every aspect of academic work. All students and staff are expected to uphold these standards both individually and collectively, and to act honourably in the pursuit of learning, teaching and research. Academic misconduct in all its forms contravenes the values of the LSE, as well as those of the wider academic community.			
DECLARATION: Please acknowledge the declaration by signing using your candidate number in the box e.g. Candidate 32784. <i>I solemnly undertake to abide by the Department of Economics Honour Code during this assessment.</i>		45405
